ZONING

is the solution to problems with discomfort caused by air conditioning systems with a single centralised thermostat

Rational use of energy, consumption adjusted to actual requirements.

Avoiding the use of air conditioning in unoccupied zones

Personal comfort

For each of the different zones

Adaptable to all types of buildings and air conditioning systems

Direct expansion, VRV, hydronic systems...

- 50%

Energy saving of up to 50%

Compared to conventional centralised installations

Open communication

With home and building automation systems

Complete integration

With the air conditioning unit thanks to the communications interfaces

Flexible For both wired and wireless solutions

Zoning enables an independent temperature control in different zones of residential, commercial and office buildings, with a single Air conditioning ducted unit.

CONFORT AND ENERGY SAVING

Why control all the zones in the same way in centralized air conditioner?

By dividing the rooms into zones you can calculate the air conditioner for its maximum simultaneous power (considering occupation, orientation of facades ...), not for its maximum total power, obtaining savings in the initial investment and energy in the nominal power consumed by the air conditioner.

APPLICATIONS AND REFERENCES

In residential and commercial buildings, where the personal comfort and the rational use of energy are a requirement.

Flats, apartments and houses, to reach the total confort in each of the rooms of your house. Also in offices and commercial buildings to allow an independent temperature control of each zone, avoiding to use the air conditioning in unoccupied zones.

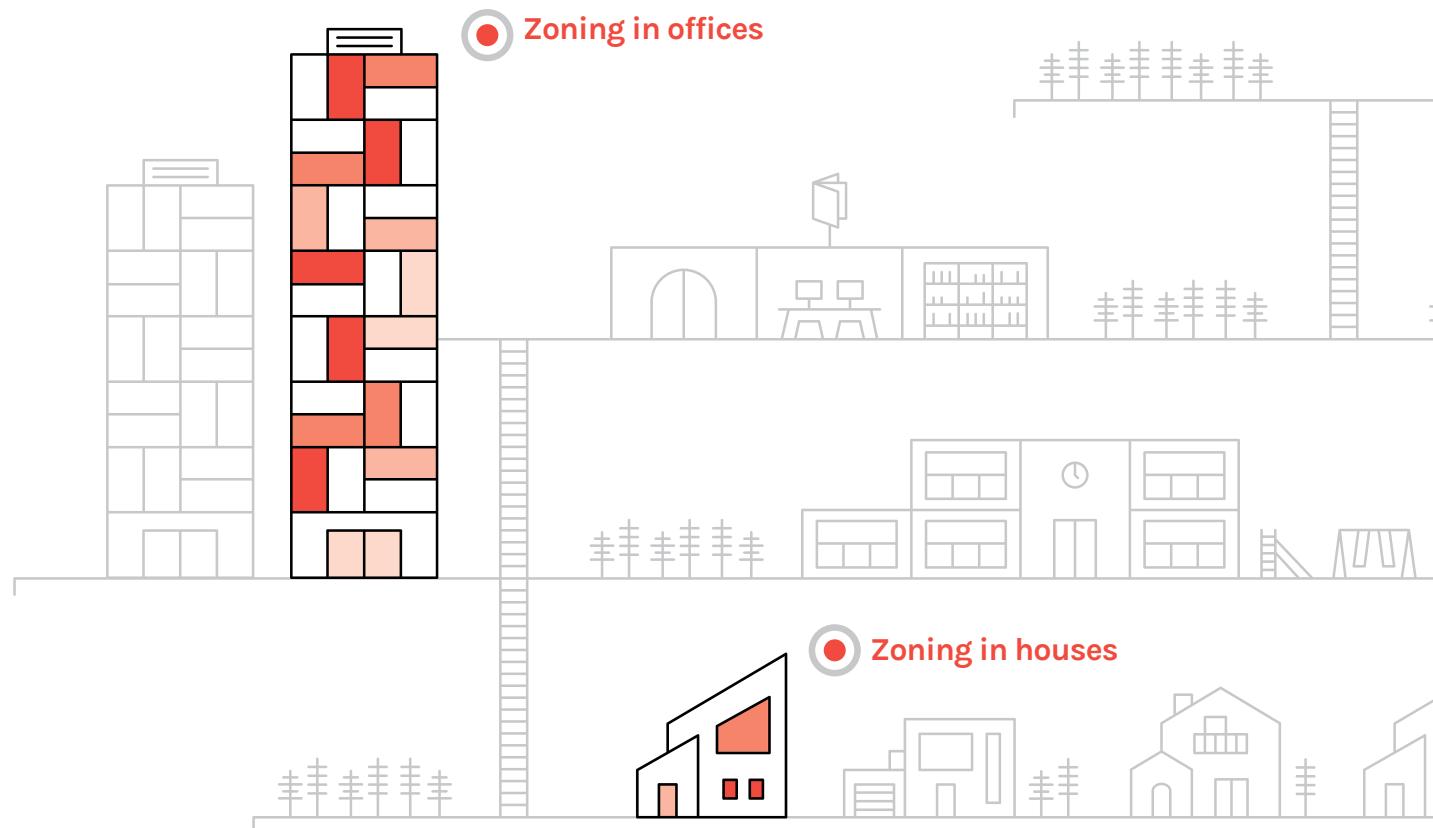

More than 25.000 installations and 15 years of experience endorse our system, being able to give the proper solution for any requirement from our customers.

ZITY multi-zone control platform, is the solution for any type of buildings...

DIRECT EXPANSION 1X1

Control of any Direct expansion (DX) air conditioning unit, using the corresponding machine interface of each brand and model.

Complete integration of the changeover Cooling/Heating from the MADEL master thermostat, semi-automatic fan speed control and optimization of Inverter system to reduce the power consumption.

DIRECT EXPANSION VRF

Control of VRF ducted direct expansion (DX) units, using the corresponding machine interface of each brand and model.

The integration of VRF protocols in a new **ZITY** control unit means that the VRF equipment functionalities can be combined with all the advantages of a **Zoning** system.

The RS485 remote port permits communication with the BMS system using the Modbus RTU communication standard.

DUCTED FAN-COIL UNITS

Control of ducted fan-coil units, in individual or centralized installations and for 2 or 4 pipes configurations.

Water valve (on/off) and fan speed control (conventional or inverter). Protection Temperature sensors and auto-mode detection.

...and any centralized air-conditioning system

MULTIZONE HEATING SYSTEM

For centralized multi-zone heating installations, with radiators or underfloor heating.

Thermostatic valve and pump or heater control by the use of free contact relays.

NTC protection sensor included.

HYBRID SYSTEM

For installations where air ducted units and radiant units are combined in the same installations.

Specific control protocols for air-to-water systems.

Integration of all the different climatization systems in the same single thermostat.

MAXIMUM ACCURACY

The **ZITY** control panel, and the **ZOE** and **ZEBRA** room thermostats have reached a CA 0.3 and 0.4 accuracy coefficient (following the EN15500 European Norm). Achieving, at the same time, the **Eu.bac certification** that guarantee the maximum energetic efficiency in the building regulation systems.

ZMARTBOX IS THE PLUG&PLAY SOLUTION FOR ANY RESIDENTIAL OR COMMERCIAL AIR CONDITIONING INSTALLATION

ZmartBox is the plug&play solution for multi-zone control in ducted AC installations.

ZmartBox is formed by a Zoning control kit (control unit + thermostats + communication interface) and a motorised distributing plenum (with 2 to 6 outputs + bypass if necessary), compatible with most internal air conditioning units based on direct expansion and duct fan-coils.

The **ZmartBox** set is delivered completely cabled, configured and ready to be installed onsite **#PlugandPlay**.

5 ZOE Wireless Zone Thermostat

6 Supply Grille

7 A/C Machine Communication Interface

8 ZITY Central Control Unit

9 NETBOX Communication Interface

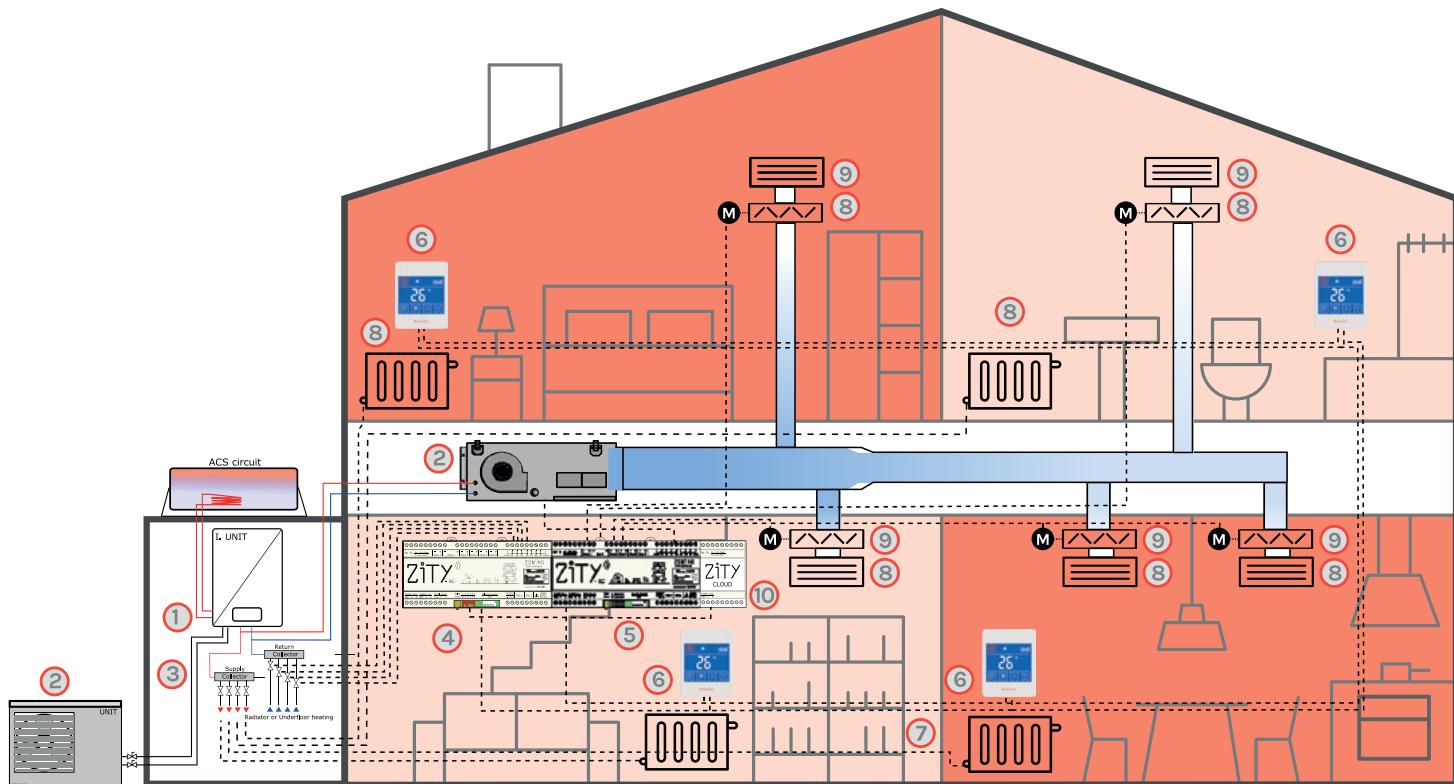

COMBINED AIR CONDITIONING AND HEATING

Zoning offers the possibility of multi-zone control in hybrid air/water systems, whether by Combining direct expansion units with boilers or Air-to-water units that combine ducted fan-coils and radiators.

The **ZITY** modular control system allows to combine both type of installations (air+water) to guarantee the optimal control of both.

For any type of residential or commercial facilities, where the combined systems are usually installed. Permits adjustment of the temperature in each different room or office to the election of the occupants, as well as the deactivation of unoccupied zones.

By using a thermostat in each zone, you can increase the comfort of the occupants and reduce power consumption.

AIR CONDITIONING WITH INVERTER OR CONVENTIONAL DUCTED FAN-COIL UNITS

Zoning control for central air-conditioning installations where ducted fan-coil units (FCU) are used, either Inverter 0-10V units or conventional **zones**.

The functionalities of the **Zoning** control added to FCU's allow to guarantee an optimal installation, by controlling the water temperature, the duct pressure (using the KBY electronic pressure control) and controlling the water valves of FCU inlet..

The **ZITY control system** permits the adjustment of the temperature in each different room or office to the selection of the occupants, as well as the deactivation of unoccupied zones.

The multi-zone ducted FCU's solution is very suitable for any type of installations, from small apartments to commercial or retail buildings.

FULL DUCTED MULTI-ZONE VRF INSTALLATIONS, INTEGRATED IN BMS SYSTEMS

The integration of VRF protocols in a new **ZITY** control unit means that the VRF equipment functionalities can be combined with all the advantages of the **Zoning** system.

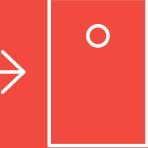

The RS485 remote port permits communication with the BMS system using the Modbus RTU communication standard. This universal protocol, along with the flexibility of the **ZITY** system permits fast integration with building management systems.

Specially conceived to use in office, commercial and public buildings where the VRF systems are commonly used.

ZMARTBOX

PLZON, PLMAC Zoning kit plug & play

> Price-list p. 24-25

ZmartBox includes a plenum PLZON, KSP central ,ZOE-RC master/slave thermostat, a communication interface with air conditioning unit (if requested) and By-pass damper if necessary.

The Zmartbox set comes fully wired, configured and ready to be installed on site. #PlugandPlay

ZMARTBOX/DX Zoning Plug&play kit for direct expansion units

ZMARTBOX/FC Zoning Plug&play kit for fan-coil units

Plenum boxes to adapt to ducted units:

PLZON Plenum for ducted AHU for motorised and by pass dampers
PLMAC Plenum wit circular spigots for ducted AHU

TYPICAL INSTALLATION DRAWING

1 PLZON

Splitter plenum box and motorised dampers: Adaptable directly to the indoor ducted AHU. Thermo-acoustically isolated.

2 ZITY

ZITY control panel: Comes wiring, configured and mounted inside an IP55 waterproof case.

3 INTERFACE

Communication interfaces between **Zoning** and ducted direct expansion units. Allows the changeover cooling/heating from the **Zoning** master thermostat, the automatic fan speed adjustment and an increase of the efficiency due to the modulation of the set-point.

4 BYPASS*

Mechanical or electronic by-pass dampers: to adjust the pressure variations due to the closure of the zone dampers.

*They should be installed when the modulation of the ventilation speeds controlled by the interfaces is not sufficient to compensate the excess pressure in the installation.

5 THERMOSTATS

Wired (W) or radio (RC), digital chrono-thermostats, to control the temperature in each of the zones. Weekly programming, blocking functionalities and limitation of setpoint temperatures.

6 DUCTED UNIT

Air conditioning ducted unit. Could be a direct expansion or an hidronic fan-coil unit. Consult for the compatibility of each brand and model.

* Not supplied by Madel.

> Price-list p. 21

ZITY

Multi-zone system for centralized air conditioning and heating installations

- > From 2 to 18 zones
- > COMMUNICATION
 - Wireless or wired
- > APPLICATION
 - For Direct expansion, fan-coil or radiant units
- > INTEGRATION
 - into BMS Modbus RTU

Control platform for air conditioning and heating equipment for 2 to 18 zones. Control of direct expansion units, hydronic fan coil units and underfloor heating systems or radiators. Communication with the thermostats in the zone via Radio or wired. Comes with 2 Rs485 communications ports for integration into building management systems.

Control panels

ZITY-RC 2-6 zones radio controlled control panel

ZITY-W 2-6 zones wired control panel

Zone expansion modules

ZITY-W/ME 7-12 Expansion module from 7 to 12 zones

ZITY-W/ME 13-18 Expansion modules from 13 to 18 zones

Control panel for combined installations

ZITY-RC/MC Wireless control panel for combined installations

ZITY-W/MC Wired control panel for combined installations

SLAVE control panels for centralized mode (heating/cooling) installations

ZITY-RC/S Wireless control panel SLAVE configuration

ZITY-W/S Wired control panel SLAVE configuration

IMPLEMENTED SOLUTIONS

→ Direct expansion (DX)

- **1x1:** Split 1x1 units control by using the machine communication interfaces.
- **VRF:** VRF units control by using the machine communication interfaces and specific protocols and functionalities for this kind of installations.

→ Hydronic

- **2-4 Pipe Fan-coil Units:** Fan speed and water valve control. Optionally remote mode (heat-cool) setting.
- **Mutli-zone heating:** By controlling up to 18 thermostatic zone valves. For radiators or under-floor heating installations.

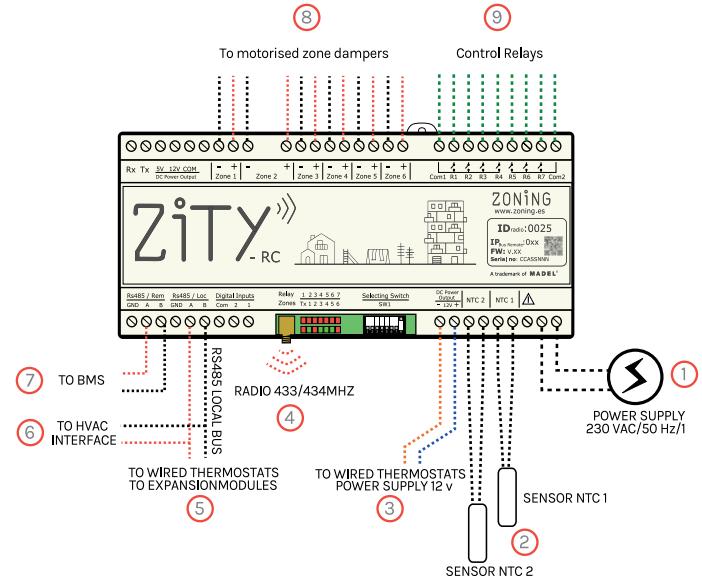

→ Combined

- **Air-to-water:** Specific protocols for this type of installations.
- **DX+multi-zone heating:** To integrate both systems, direct expansion and radiators or under-floor heating, in each single zone thermostat.
- **Fan-coil +multi-zone heating:** To integrate both systems, Fan-coil and radiators or under-floor heating in each single zone thermostat.

FleXifan

Adaptive fan-speed control of the ducted unit, in function of the number of zone and the typology of the installation.

BASIC WIRING DIAGRAM

1. Power Supply: 230 VAC/50 Hz/1

2. NTC temperature Sensors. Ask for locating it in function of machine type.

3. Power Output 12 VCC for wired thermostats.

4. Radio Antenna 433/434 MHz (only for ZITY-RC).

5. Local communication bus Rs485. For wired thermostats and expansion modules.

6. Local communication bus Rs485. To communicate with machine interfaces. Parallel connection with the previous bus.

7. Remote communication bus Rs485. To communicate with external BMS modbus RTU systems.

8. Power Output 24 VCC for motorized dampers. Maximum 2 dampers for zone.

9. Output relays. Ask for specific wiring of each unit.

TECHNICAL CHARACTERISTICS

→ ZITY Control unit

- Power 230 VAC/50-60 Hz. ZITY consumption: 6 VA.
- 230 VAC/5A relay outputs (maximum load: 5A. Cos Φ=1)
- Protection grade: IP 20
- Electrical insulation protection, Class II
- Operating temperature: 0 °C a 55 °C
- Storage temperature: -10 °C a 60 °C
- Dimensions (LxHxZ) 160x90x65 mm
- Weight 0.5 kg

→ ZITY/RC

- Mean range Radio: 50 m in open field, 20 m in habitat. Adjustable external antenna
- Frequency 433.33 MHz (Optional: 433.92 MHz). Work cycle <10%
- For installation up to 2000 m above sea level. Receiver, CAT III

ZEBRA

Touch screen wired chrono-thermostat

CA=0,4

> Price-list p. 21

ZOE

Digital wireless chrono-thermostat

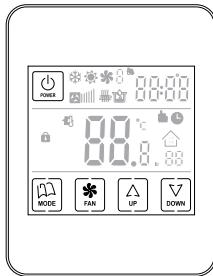

CA=0,3

> Price-list p. 21

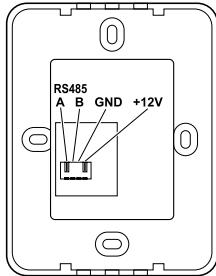

Wired (W) digital chrono-thermostat, to work in conjunction with the **ZITY** control platform. Two-way communication between the **ZITY** control unit and the thermostat. Integration of Master/Slave mode in the thermostat. No batteries required.

FUNCTIONALITIES

- Individual temperature zone control
- ECO temperature mode
- ON/OFF of each zone and ON/OFF of the whole system (using Master thermostat)
- Fan-speed control
- Working mode control (Heat, cool, fan, dry)
- Weekly programming
- Blocking functionalities to avoid improper use
- Maximum and minimum set-point limits

BASIC WIRING DIAGRAM

- A12 VDC power supplied by the ZITY control panel.
- Modbus RTU communication with the ZiTY control panel.

The connector is located in the rear part of the thermostat. See attached drawing.

TECHNICAL CHARACTERISTICS

- Power supply: 12 VDC
- Consumption: < 0.3 VA
- Control output: Modbus RTU Rs485
- Wiring S<1.5 mm²
- Operating temperature: 0 °C to 50 °C
- Storage temperature: -20 °C to 60 °C
- Humidity Range: 10-90% (no condensation)
- Wall mount with bolts (supplied)
- Protection grade: IP 20
- NTC10K Temperature sensor. Accuracy 0.1 °C
- Configurable control hysteresis +/-0.2 to 0.5 °C
- CA control accuracy according to Standard EN15500. CA=0.4 (Test report CLMS17-742. CSTB)
- Economy ECO mode
(±3 °C setpoint temperature variation)
- Frost protection for T<7 °C+/-3 °C
- Dimensions (LxHxZ) 85x108x13 mm
- Weight 0.11 k

FUNCTIONALITIES

- Individual temperature zone control
- ECO temperature mode
- ON/OFF of each zone and ON/OFF of the whole system (using Master thermostat)
- Fan-speed control
- Working mode control (Heat, cool, fan, dry)
- Weekly programming at 2 levels (confor/ECO)
- Blocking functionalities to avoid improper use
- Maximum and minimum set-point limits

TECHNICAL CHARACTERISTICS

- Power (2x1.5 V LR06 AA batteries (alkaline)
- Average battery life 1 year (or longer). The batteries are supplied with the unit
- Battery life indicator
- Carrier frequency (ISM band, Standard I-ETS 300-220): 433.34 MHz (Optional: 434.92 MHz)
- Mean range: 50 m in open field, 20 m in habitat
- Operating temperature: 0 °C to 55 °C
- Storage temperature: -10 °C to 60 °C
- Humidity Range: 10-90% (no condensation)
- Wall mount with bolts (supplied)
- Protection grade: IP 20
- NTC10K Temperature sensor. Accuracy 0.1 °C
- Configurable control hysteresis +/-0.2 to 0.5 °C
- CA control accuracy according to Standard EN15500. CA=0.3 (Test report CLMS17-741. CSTB)
- Economy ECO mode
(±3 °C setpoint temperature variation)
- Frost protection for T<7 °C+/-3 °C
- Dimensions (LxHxZ) 70x110x19 mm
- Weight 0.13 kg (with batteries)

XXXBOX

Direct Expansion (DX) ducted units communication interface

> Price-list p. 21

NETBOX

CLOUD communication interface

> Price-list p. 21

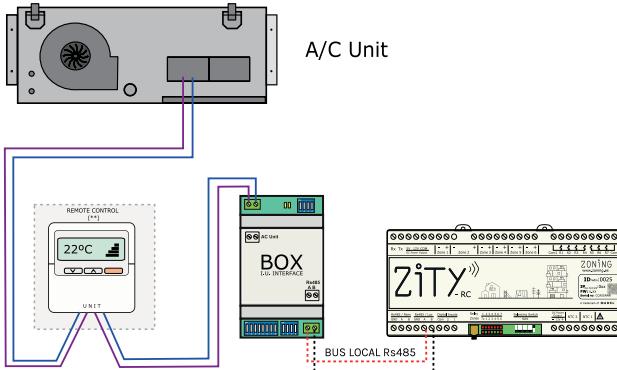

Communication interface between **Zoning** control panels and ducted direct expansion air conditioning units (1x1 or VRF).

The bidirectional MODBUS communication allows to optimize the operation of both the **Zoning** system and the air handling unit, allowing an improve of the comfort and of the power consumption.

FUNCTIONALITIES

- Allows the complete integration between Zoning System and the air handling unit.
- Allows the changeover Cooling/Heating from the Zoning master thermostat.
- Increases the Inverter system efficiency and reduces the power consumption.
- Allows the automatic fan speed adjustment of the unit improving the comfort and the acoustic level

BASIC WIRING DIAGRAM

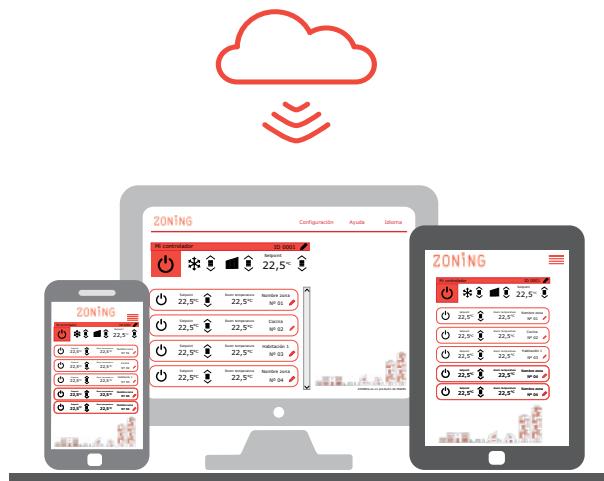

TECHNICAL CHARACTERISTICS

- Enclosure Plastic, type PC (UL 94 V-0)
Color: Light Grey
- Mounting Wall DIN rail EN60715 TH35
- Port 1 x Serial EIA485 Plug-in screw terminal block (2 poles)
- Compatible with Modbus RTU EIA-485 networks
- Operating Temperature: 0 °C to 60 °C
- Storage Temperature: -20 °C to 85 °C
- Storage Humidity: <95% RH, non-condensing
- Isolation voltage 1500 VDC
- Isolation resistance 1000 MΩ
- IP 20 isolation
- Net dimensions (DxWxH) 93x53x58mm
- Weight 85 g.

Communication interface between **ZITY** control panels and the CLOUD application of the **Zoning** system.

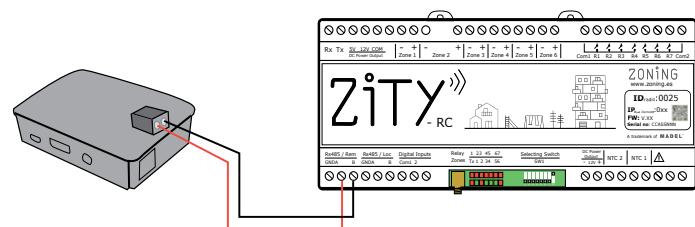

Fast and easy remote control of your **Zoning** system, from any portable device (Smartphone, tablet) or desktop computer (PC), thanks to the responsive **Zoning** Webapp

FUNCTIONALITIES

- Control all your installations from one single application.
- Display of the current state of all your Zoning systems
- Total control for each one of the installations:
 - > ON/OFF of all system
 - > ON/OFF of each zone
 - > Remote changeover
 - > Fan-speed control
 - > Room temperature display
 - > Remote control of Set-point temperature
- Easy Yearly programming tool to create all the schedules during the year
- Alarm display to have your system under control.

BASIC WIRING DIAGRAM

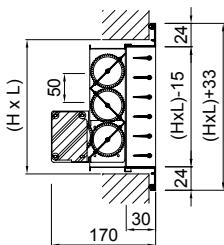

ZP-AZ

Motorized damper for grilles

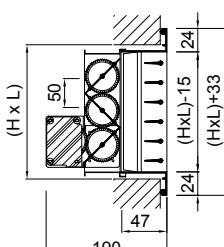

> Price-list p. 22

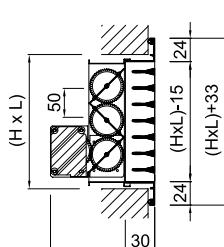

Motorized opposed blades volume damper (24 Vdc), suitable for **Zoning** grilles. Blades incorporate a PVC airtight joint. Constructed from aluminum, galvanized steel and gears from polyamide.

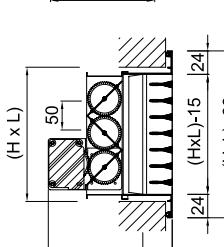

AMT-AN+ZP-AZ Damper with air supply single deflection grille from aluminum. Individually adjustable blades parallel to the largest side (L size).

CTM-AN+ZP-AZ Damper with air supply double deflection grille from aluminum. Individually adjustable blades, parallel to the largest side (L size) in the first row.

LMT+ZP-AZ Damper with air supply/return linear grille from aluminum. Fixed bars parallel to the largest side (L size).

LMT-DD+ZP-AZ Damper with air supply linear grille from aluminum. Front bars parallel to the largest side (L size) and second row of individually adjustable blades parallel to the shortest side (H size).

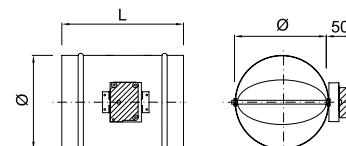

ZC, ZR i ZQ

Duct motorized damper

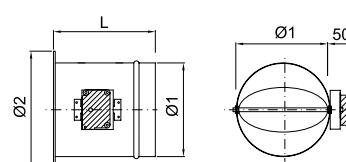

> Price-list p. 23

Motorized volume dampers (24 Vdc) suitable to control the air volume in ducts in **Zoning**.

ZR Motorized circular damper. Constructed from galvanized steel and air tightness joint and bearings from rubber. Incorporated in any plenum box.

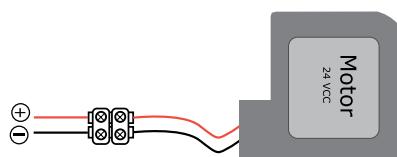

ZQ Motorized square damper with blades of 100 mm, parallel to the largest side (L size). Constructed from aluminum and gears from polyamide. Rectangular duct mounting.

TECHNICAL CHARACTERISTICS ZP-AZ - ZC - ZR - ZQ

- Power supply 24 VDC
- Nominal Power 0.22W
- Nominal current intensity 55 mA
- Max current intensity 250 mA
- Protection class IP54

BASIC WIRING DIAGRAM

CONTROL PROTOCOL

To avoid damaging the actuator, the open and closing of the dampers is controlled by time (that is done by default in the **Zoning** control panels)

→ OPEN: 5 sec + 24 VCC

→ CLOSE: 5 sec - 24 VCC

KBY

ZP-AZ, ZC, ZR, ZQ
Electronic pressure control

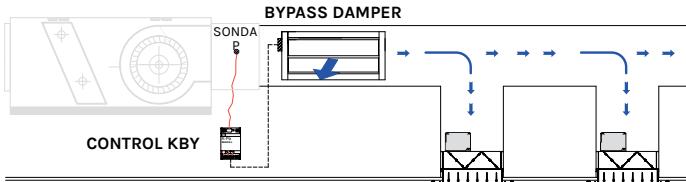

> Price-list p. 23

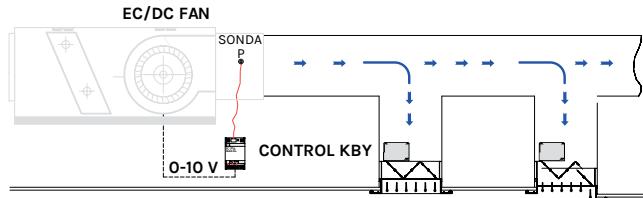

KBY pressure control module enables to set and maintain a constant pressure in a low and medium pressure duct network (20 to 300 Pa). The unit can act on a bypass damper (ZP-AZ, ZC/ZR/ZQ) by means of a 24 Vdc output or directly with a 0-10V output on an EC/DC fan, a frequency variator or a damper with a proportional motor.

The KBY unit includes a pressure sensor, a selection switch and a rotary switch, which enable you to easily set the pressure to be maintained.

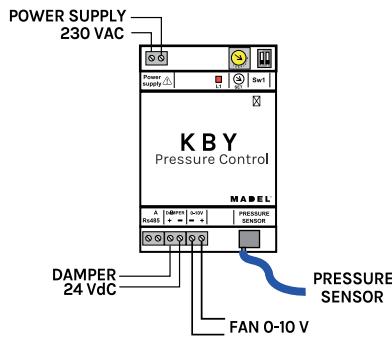

PRESSURE CONTROL ON BYPASS DAMPER

PRESSURE CONTROL ON EC/DC FAN

BASIC WIRING DIAGRAM

TECHNICAL CARACTERISTICS

- Power supply 230 Vca ± 10%, 50/60 Hz. Consumption: 4 VA
- 1 output 24 Vcc, for ZQ / ZC /ZR damper control
- 1 output 0-10 VDC , for EC motor control or proportional damper motor
- Pressure sensor
 - > Nominal measurement range 20 to 300 Pa
 - > Average precision ±5% with respect to set-point
- RS-485 communications bus
- Protection rating: IP 20

ZS, ZG i ZK

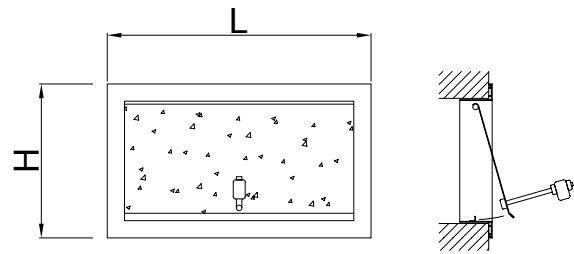

Mechanical by-pass dampers

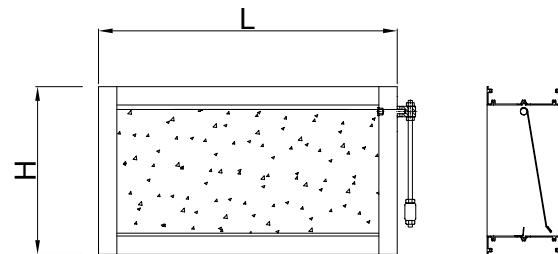

> Price-list p. 23

Adjustable pressure dampers by means of a counterbalance to maintain the pressure balance in the ductwork for **Zoning** System Constructed from aluminium and galvanised steel.

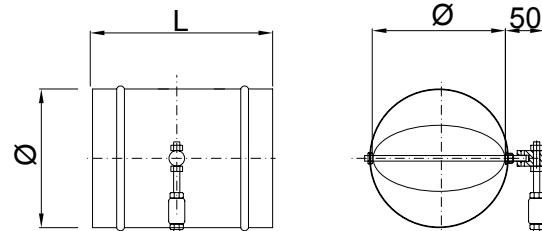

ZS Pressure damper for wall mounting by means of visible screws.

ZG Pressure damper for rectangular duct mounting.

ZK Pressure damper for circular duct mounting.

Duct or plenum motorised dampers ZC / ZR / ZQ

Motorised volume dampers (24 Vdc) suitable to control the air volume in ducts in **Zoning** installations.

ZC Circular duct mounting

ZR With flange for plenum mounting

/AIS External isolation layer 5 mm for ZC/ZR dampers
(+15% supplement)

ZQ Motorised square damper (24 Vdc) for rectangular duct mounting.

ZmartBox. Zoning Plug&Play

ZmartBox consists of a kit of control Zoning (control panel+thermostats communication interface) and a splitter plenum box (2 to 6 powered outputs +by pass if applicable) compatible with most indoor air conditioning ducted type unit. The Zmartbox set comes fully wired, configured and ready to be installed on site

/DX For Direct expansion units. Communication interface with the unit included

/FC For Fan-coil installations. NTC sensor included for water temperature control

/RC Wireless Radio-controlled Kit. ZITY-RC control panel + ZOE-RC wireless thermostats

/W Wired kit. ZITY-W control panel + ZEBRA-B wired thermostats

/KBY Includes KBY pressure control + ZC/ZQ/ZR motorized damper

Plenum boxes to adapt to ducted units

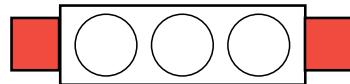

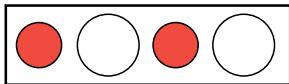

PLZON Plenum for ducted AHU for motorised and by pass dampers

PLMAC Plenum wit circular spigots for ducted AHU

SELECTION TABLE

ZMARTBOX / PLZON / PLMAC are compatible with any concealed ducted unit. The next table shows the most common units. For any other brand/model please consult.

ST Standar models

ST (1) Standar model but with airflow problem. The ducted unit supplies more airflow than the advised for the motorised dampers

SP Special models. The PLZON plenum box is bigger than the ducted unit. It require and adapter. Apply the supplement SP for the price

Return grilles

DMT-AR Air return grilles with fixed blades at 45° constructed from aluminium. Grille with blades parallel to the largest side (L size)

EMT-AR Air return grilles with fixed blades at 45° constructed from aluminium. Grille with blades parallel to the shortest side (H size)

FIXING

(S) Clips. It requires mounting frame CM

(O) Hidden screw. It requires mounting frame CM
(supplement 2,54 €)

NTC sensor

NTC Temperature sensor NTC 10k suitable for ZITY, KSP, KCA control panels

5,58 €

Wind Cable

Wind of 100 m of cable (red/black 2x0,75) for the actuators connection

58,46 €

CAB Wind of 100 m of shielded cable (4 x 0,5) for ZEBRA thermostats

152,16 €

Antenna 433/434 Mhz

Antenna for radio reception 433/434 Mhz, suitable for ZITY, KSP and KRCPLUS control panels

34,54 €

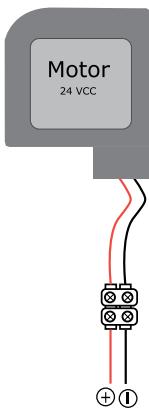

Antenna extender

5 m extender for Zoning systems antennas

45,42 €

Spare part motors

ZP motor: for grille motorized dampers type ZP-AZ

58,46 €

ZC motor: For circular motorized dampers type ZC/ZR

58,46 €

ZQ motor: For rectangular motorized dampers type ZQ

55,62 €

Electrical Enclosure

CIP Insulating IP40 modular box with incorporated DIN rail. Allows to protect the control panels from dust and humidity in aggressive atmospheres

57,83 €

ON/OFF Connection packs

Set of connectors for the interconnection between Zoning control panels and ducted air handling units (AHU). For units not compatibles with AHU interfaces

MIT Pack Compatible with conventional and inverter type MITSUBISHI ELECTRIC units

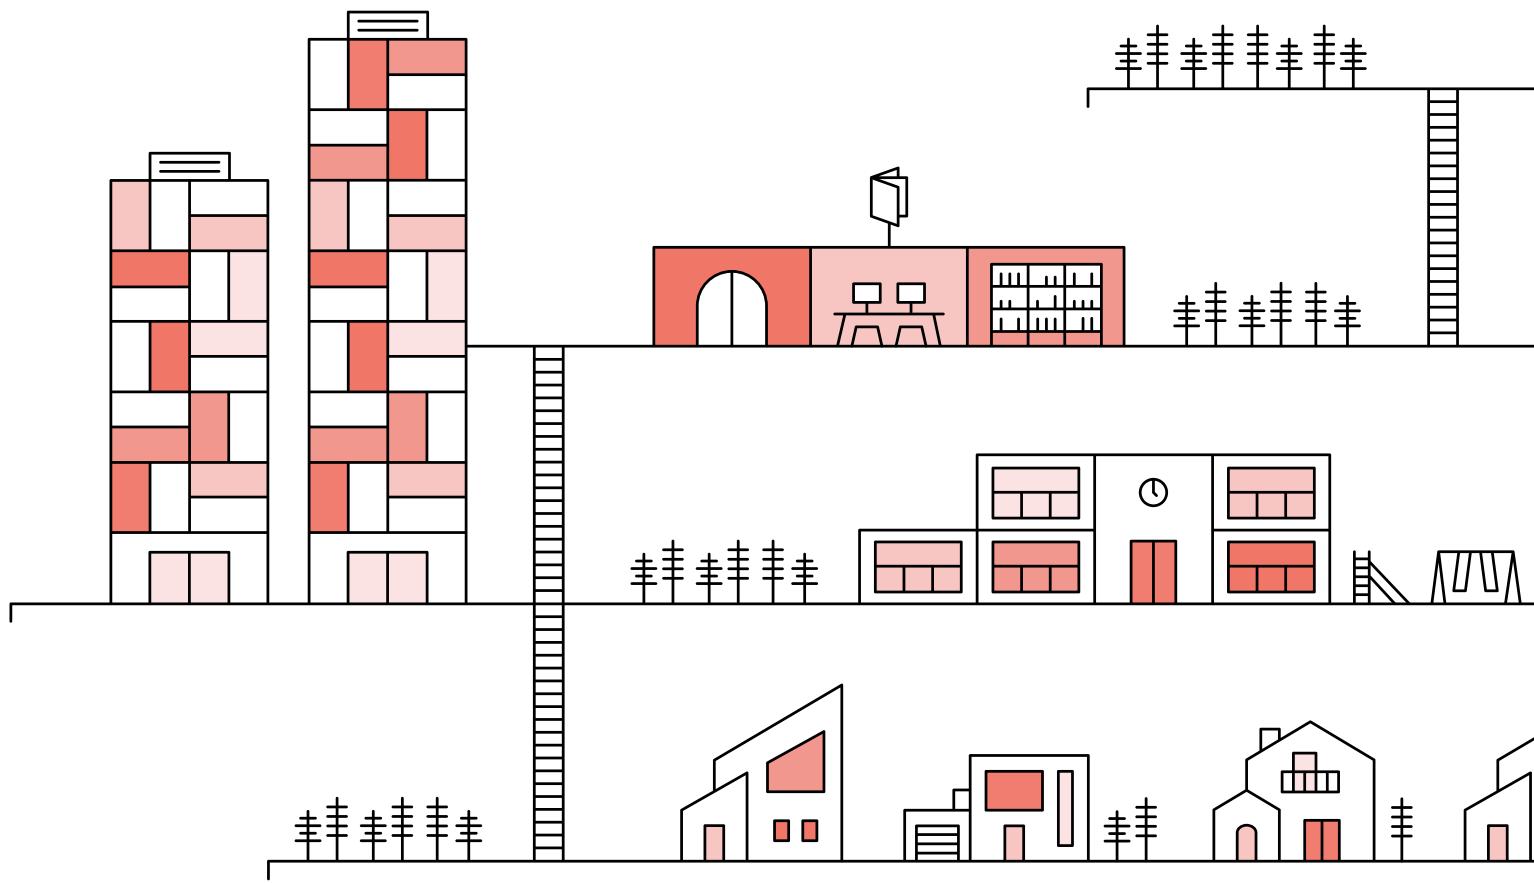

18,06 €

EKO Pack Compatible with conventional and inverter type (except VRV and FDXS, CDXS) DAIKIN and conventional and inverter units of PANASONIC Semi-industrial or VRV

13,54 €

GEN Pack Compatible with conventional and inverter type (powers from 24 to 54 of R410A) GENERAL, FUJITSU, FUJI-ELECTRIC, HIYASU. Also compatible with A CLASS models of such manufacturers

19,97 €
